PROCESS DEVELOPMENT

EXPANDED TOBACCO

H.B.

- The mandatory TUV inspection in PMG Munich has been completed and the KEU modified process gas heat exchanger was installed during the shutdown. Pressure tests were performed by TUV and some leaking tubes in the HE-1 CO2 condenser were repaired.

HB

In preparation of the DIET plant hazard review the affiliates are working on up-dating their documentations.

All affiliates have received a proposal from Kellogg on the CO2 Piping Support Survey (ET-PAN-EUROPE).

JM STATUS?

- The DIET and NET trial products from the runs in the Richmond pilot plant arrived in Neuchâtel and were used to process cut filler blends for Pan-European Marlboro, German Marlboro and PM Superlights in the Miniprimary. Cigarettes were produced and the evaluation is in progress (EURONET).

TOBACCO PROCESS QUALITY PROGRAM (GIOTTO)

12-17 MLS/RPH/KHR

- September highlights were issued. Quality 1 for the Munich and FTR facilities and were both locations. Detailed discussions took 1 Services group to transfer the publication

Any one know about this? If so, what? (For KSH) Done 191 JM

RECONSTITUTED TOBACCO

- TLA is in progress on the sheet samples fr levels from 2.8 to 8.4 % (STELLA).

- Cigarettes containing RLTC-type sheet made and not accepted. Differences were detecte substituted for RLTC at full (6.6%) and ha between Park 500 and LTR were established 1 for November (SCOTT).
